PHP UI Calls

Global Constants (session variables)

AAF = All About Framing

LJH = Larson Juhl

CDO = Centrado

LPK = Lion Pick

Stored Application Routines

Onboarding CSV

Ad hoc onboarding utilities

Procedures that support specific item data alteration and/or tidy up in the aafVendable table.

Primary sequence

Principal sequence to onboard new csv product data file from a supplier. Executes all in order (ie top to bottom)

==== STATUS

Currently in progress for Larson Juhl. (Note: Centrado and Lion Pick are pending)

aafListedAlertNotes

This procedure accesses the Alert Notes for a given vendable (in aafVendable) and returns separate text strings for each kind of flagged alert.

aafTrimVendableAlertNotes

Used to remove alert flags and alert notes. Bit immature right now. Select by supplier, type, uration and which flags to reset

aafPrepareImportedCSV

Was aaf\_PrepareImportedCSV\_LJH

Ensure the rawSupplierCSVImported matches the extant rawSupplierCSV

Parameters require supplier abbreviation

Note: this changes rawSupplierCSVImported

aafAlertMissingVendables

Was aaf\_AlertMissingVendables\_LJH

Detect an alert vendables that are no longer in supplier's CSV import

Parameters require specify supplier and whether Alert are to be reset etc

Note: Incomplete for Centred and Lion pick

aafAlertAvailability

Was aaf\_AlertAndLoadAvailability\_LJH

Detect and alert changed availability quantity or data at supplier

Parameters require specify supplier and whether Alert are to be reset etc

Note: Incomplete for Centred and Lion pick

aafAlertSupplyPrices

Was: aaf\_AlertNewSupplierPrices\_LJH

Detect and alert changed prices at supplier

Parameters require specify supplier and whether Alert are to be reset etc

Note: Incomplete for Centred and Lion pick

aafSetNonStockVendableData

Set minimal data in aafVendable for non-stock (neither regular no special order). Assume usage deference to raw data. Parameters allow: operation by supplier or all suppliers.

aafAlertAndAddNewVendables

Was: aaf\_InsertNewVendables\_LJH

Detect the arrival of a new vendable and add it to the aafVendable table

Parameters require specify supplier

Note: Incomplete for Centred and Lion pick

NOTE: MUST BE CALLED AFTER aafSetNonStockVendableData

aafApplyVendPriceRules

\*Populates the aafListBaselinePrice and aafBuyPrice fields of the aafVendable table with the values needed by AAF according to their business rules found in aafVendPriceRule.\*

Parameters allow choice of supplier.

aafImportWrapUp

WAS aaf\_WrapUp\_LJ

Replaces content of extant rawSupplierCSV with rawSupplierCSVImported

Then DROPS rawSupplierCSVImported

Parameters require supplier abbreviation

Larson-Juhl test Script

A test script to show that the onboarding process for Larson Juhl is satisfactory

Vendable specific

Repricing Vendables

aafSetVendItemCost

Only a notion right now - no implementation

Re-Typing Vendables

Raw Vendable data

aaf\_SummariseSupplierRaw

Audit followup

General

aafVendReportWhere

This generates a list of storage places identified for each vendable in a given audit. Parameters allow specification of audit ID; default is most recent.

aafGetSessionVariable

aafGetVendFullPath

Objects

WORD PRESS

e8\_etc

These are Word Press coexisting with AAF-Hub tables

aafVendable

Definitive super catalog of vendables

aafServiceActivity

Definitive catalogue of fulfilment activities

aafJob

Binder of vendables and activities necessary and sufficient to fulfil a sales line item (eg frame a picture)

aafVendStocktakeHistory

This holds the actual vendable level data for each aafStocktakeEvent. A junction table with aafVendable and aafVendStocktakeEvent ids as foreign keys

aafVendStocktakeEvent

This catalogues the audit events. Each event has an id used as a foreign key in aafVendStocktakeHistory

aafVendPriceRule

This holds to rules to calculate aafBuyPrice and aafBaselineListPrice (both in aafVendables) from the suppliers' datasets.

rawCentrado

Persisted copy of latest rawCentradoImported

rawCentradoImported

Use and delete after new rawCentrado instantiated at end of CSV onboarding

rawLarsonJuhl

Persisted copy of latest rawLarsonJuhlImported

rawLarsonJuhlImported

Use and delete after new rawLarsonJuhl instantiated at end of CSV onboarding

rawLionPic

Persisted copy of latest rawLionPicImported tables

rawLionPicPricesImported

Use and delete after new rawLionPic instantiated at end of CSV onboarding

rawLionPicImageImported

Use and delete after copy
